PCC AGEED STATEMENT REGARDUING THE PRESENT SITUATION OF OUR CHURCH BUILDING AND OUR EXPECTATIONS FOR THE FUTURE

1. We agree that the limits of our financial resources mean there is no possibility of repairing the church roof.
2. In light of this we agree that the damage being done by water ingress means that the building is coming to the end of its useful life.
3. We recognise that the land at the rear of the church has the potential for redevelopment as housing, potentially offering a financial way forward.
4. We see as the ideal that we retain the front part of the site for development of a new, much smaller church building.
5. If that is not possible because of the financial constraints, we anticipate selling the whole site for housing, and we would then want to consider all possibilities for the future of our church.*
6. In the meantime we commit ourselves both to the care and support of our existing congregation and to playing our part to the best of our ability in our local community.

* Possibilities might include hiring suitable premises for church activities, especially Sunday worship, or in some way sharing resources, or considering whether it might be possible to build on a different site.

Agreed by PCC members by email in the week beginning 9th November 2026
